Personal Data
Name: Mostafa Eslami
Date of birth: December 11, 1982.
Nationality: Iranian.
Address: Department of Mathematics, Faculty of Mathematic Sciences, University of Mazandarn, Babolsar, Iran

Email: eslami_mostafa@yahoo.com   mostafa.eslami@umz.ac.ir meslami.edu@gmail.com

Mostafa Eslami was born in Nour, Iran, in 1982. He received his M.S. and Ph.D. degrees in applied mathematics from University of Guilan, IranHe is Assistant Professor in Applied Mathematics at University of Mazandaran, Babolsar, Iran. His research interests include numerical methods for functional equations, numerical linear algebra, and nonlinear sciences.

Papers

[1]   Analytic solution for Telegraph equation by differential transform method, Phys. Lett. A, 374(2010) 2904-2906. (ISI)
[2]   Application of homotopy perturbation method for systems of Volterra integral equations of the first kind, Chaos Solitons Fractals, 42 (2009) 2597-3246. (ISI)
[3]   Modified HPM for solving systems of Volterra integral equations of the second kind, Journal of King Saud University (Science) 23 (1) (2011) 35-39. (ISI)
[4]   A reliable algorithm for solving nonlinear Jaulent–Miodek equation, Journal of King Saud University (Science) 23(2) (2011) 133-137. (ISI)
[5]   Differential transform method for special kinds of systems of integral equations, Journal of King Saud University (Science) in press. (ISI)
[6]   Differential Transform Method for Solving Helmholtz Equation, Differential Transform Method for Solving Helmholtz Equation, 10 (2)(2010)166-168. (ISI)
[7]   Differential transform method for systems of Volterra integral equations of the second kind and comparison with homotopy perturbation method, International Journal of the Physical Sciences, 6(5) (2011) 1207-1212. (ISI)
[8]   Explicit solutions of nonlinear (2 +1)-dimensional dispersive long wave equation, Journal of King Saud University (Science) 24(1) 2012 69-71.(ISI)
[9]   Differential transform method for nonlinear fractional gas dynamics equation, International Journal of the Physical Sciences, 6(5) (2011)1203-1206. (ISI)
[10] A new homotopy perturbation method for solving systems of partial differential equations, Computers and Mathematics with Applications, 62(1) 2011 225-234. (ISI)
[11] Homotopy Perturbation Method and Taylor Series for Volterra Integral Equations of the Second Kind, Middle-East of Scientific Research 7 (4) (2011) 604-609. (ISI)
[12] Approximate solutions to Fornberg-Whitham type equations International Journal of Numerical Methods for Heat and Fluid Flow, 22 (6) (2012) 803 – 812 (ISI)
[13] An Efficient Method for Cauchy Problem of Ill-Posed Nonlinear Diffusion Equation, International Journal of Numerical Methods for Heat and Fluid Flow, accepted. (ISI)
[14] A new technique for non-linear two-dimensional wave equation *Scientia Iranica accepted (ISI)*
[15] GMRES implementations and residual smoothing techniques for solving ill-posed linear systems Computers & Mathematics with Applications 63(1) 2012, 1-13.
[16] Exact solutions of the Kudryashov–Sinelshchikov equation and nonlinear telegraph equation via the first integral method *Nonlinear Analysis: Modelling and Control* (ISI)

[17] Homotopy Perturbation Method for Systems of Partial Differential Equations, International Journal of Nonlinear Sciences and Numerical Simulation, 8(3) (2007) 411-416. (ISI)

[18] He's homotopy perturbation method for systems of integro-differential equations, Chaos, Solitons and Fractals 39 (2009) 1253-1258. (ISI)

[19] Differential Transform Method for Abel Differential Equation, World Applied Sciences Journal 13 (5) (2011)1012-1015. (ISI)

[20] New Analytic study for solving heat like equation World Applied Sciences Journal 12 (5) (2011)693-696. (ISI)

[21] Differential Transform Method for Systems of Volterra Integral Equations of the First Kind, Non l. Sci. Lett. A, 1(2) (2010)173-181.

[22] Differential Transform Method for Quadratic Riccati Differential Equation, International Journal of Nonlinear Science International Journal of Nonlinear Science, 9 (4) (2010) 444-447.

[23] An Efficient Technique for Solving Special Integral Equations, Applications and Applied Mathematics: An International Journal, 5(1) (2010)217 – 224.

[24] Acceleration of the convergence of He's homotopy perturbation method for solving Fredholm integral equations of the second kind, Journal of Advanced Research in Applied Mathematics, 2(2) (2010) 58-67.

[25] Exact Solutions for Non-linear Volterra-Fredholm Integro-Differential Equations by He's Homotopy Perturbation Method, International Journal of Nonlinear Science International Journal of Nonlinear Science, 9 (3) (2010) 285-289.

[26] Differential transform method for nonlinear parabolic-hyperbolic partial differential equation, Applications and Applied Mathematics: An International Journal, 5(10) (2010), 1493 – 1503.

[27] Exact solutions for wave-like equations by differential transform method, Iranian Journal of Optimization 1-6 (2010).

[28] Analytical solution Klein–Gordon equation by new homotopy perturbation method, Computational Mathematics and Modeling, accepted .

[29] Application of NHPM for Solving Helmholtz Equation, International Journal of Computing Science and Mathematics, accepted *Vol. 3, No. 4, 2012*.

[30] New Homotopy Perturbation Method for Special Kind of Systems of Volterra Integral Equations in Two-dimensional Spaces, Computational Mathematics and Modeling, accepted.

[31] Numerical solution of Sawada- Kotra equation by homotopy analysis method, Journal of the Applied Mathematics, Statistics and Informatics, accepted.

[32] Exact Solutions for Systems of Volterra Integral Equations of the Firs Kind by Homotopy Perturbation Method, Applied Mathematical Sciences, 2 (54) (2008) 2691 – 2697.

[33] A New Method for Solving the Hyperbolic Telegraph Equation, Computational Mathematics and Modeling, 2012, 23(4), 519-527

[34] G'/G Expansion method for the Drinfel'd–Sokolov–Wilson equation, Computational Mathematics and Modeling, 22 (1) (2011) 92-97.

[35] Study of convergence of Homotopy perturbation method for two-dimensional linear Volterra integral equations of the first kind, International Journal of Computing Science and Mathematics, accepted
